

# Purefix For Eset Smart Security 9 High Quality

Positive Alerts on MacOS Sierra Latest Tweets Activate SSL/TLS Encryption on Comodo Domain Manager - Go to Preferences > Advanced Setup > General and check the box for 'Always use SSL/TLS Encryption on all domain servers' and then click Apply. In the 'Advanced Setup' window that appears, enter your directory, and then click 'OK'. In the 'Advanced Setup' window that appears, enter your directory, and then click 'OK'. Your SSL/TLS settings will now be applied to any domain server you add in the future. If you delete the domain name from the Advanced Setup window, the SSL/TLS settings will be removed as well. Answered by prashant at 12:16 PM on February 16, 2016 Q: I added a domain server to my Comodo Firewall last night and it caused all of my other domain servers to be marked as False Positive. Also if I check the 'always use SSL on domain servers' the page does not show up. Can someone help? Answered by prashant at 12:16 PM on February 16, 2016 A: All of the domain servers should be marked as False Positive. Make sure that the "Always use SSL on domain servers" box is checked for all of your domain servers. Q: I just updated my Comodo Firewall 9 Smart Security to the latest version. All of my domain servers appear as False Positive. I can not select the 'Always use SSL on domain servers' checkbox on any of my domain servers. Please help! Answered by prashant at 12:16 PM on February 16, 2016 A: The 'Always use SSL on domain servers' checkbox is a "feature" of our Firewall as opposed to a "setting" of your individual domain servers. The box will only appear on the Firewall (top) General page. If you only have one domain, make sure that the "Always use SSL on domain servers" box is checked for all of your domain servers in the "Advanced Setup" window. If you have many domain servers, you will need to configure each one on its own. Q: I did the update from CF9 Smart Security to CF9 Firewall and I can't configure SSL/TLS Encryption on domain servers. I get the following error message: The domain names that you typed into this configuration do not appear to match the domain names in your web server certificates. If you are sure that the domain names are correct and you have installed the certificates properly, please delete the domain names you typed into this configuration and try again. To import the certificate, enter the "Basic import" protocol, and then import the certificate. If you are importing a self-signed certificate, it must be imported in the name that appears in the subject field of your certificate. If you don't have a
